Aborn, R. H.: *Discussion on a Metallographic Description of Fracture in Impact Specimens of a Structural Steel* 1030
Acid Conditioning of Metallurgical Smoke for Cottrell Precipitation 692
Activation Energy for Recrystallization in Rolled Copper 887
Active Slip Systems in the Simple Axial Extension of Single Crystalline Alpha Brass. Discussion 1037
Activity of Liquid Silver-Silicon Alloys 1282
Activity of Sulphur in Liquid Steel; The Influence of Copper 1389
Adams, J. Q.: *Discussion on Electrical Resistivity Measurements on Iron-Silicon Compacts Prepared by the Powder Metallurgy Procedure* 1048
Aging: hydrogen elimination by 1321
in metals. Discussion 1039
Aging Behavior of a Zinc Alloy Containing 25 pct Manganese, 15 pct Copper, 0.1 pct Aluminum 139
Aging Characteristics of Magnesium-Lithium Base Alloys 1277
Air pollution 692
baghouse practice for recovery of metallurgical fumes 793
Alexander, B. H., and Rhines, F. N.: *Dendritic Crystallization of Alloys* 1267
Alloy Systems: Chromium-carbon 41
uranium-aluminum and uranium-iron 182
uranium-tungsten, uranium-tantalum and tungsten-tantalum 195
Alloys: binary, undercooling of minor liquid phases 136
ternary 514
quaternary 539
Alloys of Copper and Iron 1486
Alloys of Titanium with Carbon, Oxygen, and Nitrogen 1261
Aluminum and aluminum alloys: aging behavior of zinc alloy 139
Bayer process 103, 861
beta copper, transformations in. Discussion 1066
cold worked, effect of prestraining temperatures on recovery of. Discussion 1364
cold worked, recovery of. Discussion 1363
dendrite arm spacing 1268
effect of alloying elements on plastic properties 933
effect on magnesium-lithium alloys 945
extractive metallurgy of 661
films, oriented arrangements of, on ionic substrates. Discussion 1062
grain boundary migration in 103
high-purity: recrystallization and coarsening texture. Discussion 1057
single crystals, plastic behavior of 1159
hydrogen solubility in 1237
interface energies. Discussion 1026
internal friction of cold-worked 575
iron-aluminum-oxygen phase distribution 423
magnesium-lithium, age hardening 1278
oxygen solubility in liquid iron containing 414
production in electrolytic cells 105
recrystallization and grain growth determined by measurements of internal friction 581
recrystallization and microstructure of aluminum killed deep drawing steel. Discussion 1059
single crystals, transverse bending. Discussion 1039
size effects in quenching. Discussion 1050
strain markings 1126
undercooling liquid phase 136
uranium, alloy system 182
phase diagram 184
American Brass Co.: *Alloys of Copper and Iron* 1486
American Electro Metal Corp.: *Microstructure of Iron Silicon Alloys as Developed by Powder Metallurgy Process* 354
American Smelting and Refining Co.: *Acid Conditioning of Metallurgical Smoke for Cottrell Precipitation* 692
Conditioning Dwight-Lloyd Gases to Increase Bag Life 608
Improved Automatic Smoke Sampler 610
Modern Baghouse Practice for the Recovery of Metallurgical Fumes 792
American Zinc Oxide Co.: *Calbeck Process for Refining Zinc Oxide* 757
Ammonia: leaching of nickel and cobalt ores 67
Analysis of Interstitial Diffusion Using Activity Methods. Discussion 1024
Anderson, E. A.: *Discussion on Structure and Nature of Kink Bands in Zinc* 1022
Anderson, R. A., Dorn, J. E., and Tietz, T. E.: *Effect of Prestraining Temperatures on the Recovery of Cold Worked Aluminum. Discussion* 1364
Andrew, K. F., and Gulbransen, E. A.: *Kinetics of Reactions of Columbium and Tantalum with O_2, N_2 and H_2* 586
Kinetics of the Reactions of Titanium with O_2, N_2 and H_2. Discussion 1063
Kinetics of the Reactions of Zirconium with O_2, N_2, and H_2. Discussion 1062
Annealing: effect in magnetic field upon iron-cobalt and iron-cobalt-nickel alloys 287
zinc and deformation processes, experimental survey 1009
Annealing twins, formation of 1324
Annealing Twins in Copper and 70-30 Alpha Brass. Discussion 1020
Ansel, G.: *Discussion on Liquid Solubility of Manganese in a Magnesium-aluminum-tin Alloy* 1029
Antimony and antimony alloys: dendrite arm spacing 1269
selenium alloys 47
titanium, binary, properties of 498
Arsenic: effect on age hardening of lead 1102
atmosphere control in steelmaking 671
Aust, K. T., and Pidgeon, L. M.: *Solubility of Titanium in Liquid Magnesium. Discussion* 1029
Austenite: carbon migration under influence of direct current 1136
diffusion coefficient of carbon in 553
growth as related to prior structure 162
Discussion 1276
spheroidite from, grain size 1465
Austenite Formation During Tempering and Its Effects on Mechanical Properties 997
Austenitic steel: sampling for hydrogen 411
Averbach, B. L.: *Plastic Deformation in the Rolling Process* 150
Recovery and Recrystallization in Brass. Discussion 1057
Discussions: on Free Energy Change Accompanying the Martensite Transformation of Steels 1066
on the Study of Grain Boundaries with the Electron Microscope 1028

H

Backofen, W. A.: *Torsion Texture of Copper* 1454
Bayertz, M.: *Discussion on Discontinuous Crack Propagation—Further Studies* 1036
Baeyertz, M., Craig, W. F., Jr., and Bumps, E. S.: *Effect of Ferrite Grain Structure Upon Impact Properties of 0.80 Pct Carbon Spheroidite* 1465
Metallographic Description of Fracture in Impact Specimens of a Structural Steel. Discussion 1030
Baeyertz, M., Craig, W. F., Jr., and Sheehan, J. P.: *Effects of Molybdenum and Commercial Ranges of Phosphorus upon the Toughness of Manganese Steels Containing 0.40 Pct Carbon* 389
Effects of Molybdenum and Commercial Ranges of Phosphorus upon the Toughness of 0.40 Pct Carbon Chromium Steels. Discussion 1035
Baghouse practice for recovery of metallurgical fumes 782
Bag life, conditioning Dwight-Lloyd gases to increase 608
Bailey, P. F., and Harris, W. J., Jr.: *Austenite Formation During Tempering and its Effects on Mechanical Properties* 997
Bain, J. W., Larsen, B. M., and Brower, T. E.: *Oxygen in Liquid Open-Hearth Steel—Oxidation During Tapping and Ladle Filling* 851
Bainite, formation of austenite from 165
Bakalar, I. D., Cohen, M., and Buffington, F. S.: *Discussion on Self-Diffusion in Alpha and Gamma Iron* 1374
Baldwin, W. M., Jr.: *Discussion on Secondary Recrystallization in Copper* 1054
Balicki, M.: *Discussions: on Electrical Resistivity and Thermoelectric Power of Antimony-Selenium Alloys* 1367
on Effects of Three Interstitial Solutes (Nitrogen, Oxygen, and Carbon) on the Mechanical Properties of High-purity, Alpha Titanium 1368
Banerjee, B. R.: *Study of Strain Markings in Aluminum* 1126
Discussions: on Stages in the Deformation of Monel Metal as Shown by Polarized Light 1041
on Transverse Bending of Single Crystals of Aluminum 1039
Barrett, C. S.: *Faults in Structure of Copper-Silicon Alloys* 123
Discussion 1358
Discussions: on Annealing Twins in Copper and 70-30 Alpha Brass 1021
on Effect of Solute Elements on the Tensile Deformation of Copper 1367
on Origin of Annealing Twins in Brass 1020
on Recovery and Recrystallization in Brass 1057
Barrett, C. S., and Clifton, D. F.: *Transformation Characteristics of a Lithium-Magnesium Alloy* 1329
Barrett, C. S., Guttman, L., and Bowles, J. S.: *Crystallography of Cubic-Tetragonal Transformation in the Indium-Thallium System* 1478
Barrett, C. S., and Hess, J. B.: *Structure and Nature of Kink Bands in Zinc. Discussion* 1022
Batisse, M., and Laurent, P.: *Discussion on Transformation of Gamma to Alpha Manganese* 1068
Battelle Memorial Institute: *Aging Characteristics of Magnesium-Lithium Base Alloys* 1277
Alloys of Titanium with Carbon, Oxygen, and Nitrogen 1261
Ductility of Cast Molybdenum 1149
Effect of Sodium Contamination on Magnesium-Lithium Base Alloys 1171
Effects of Nitrogen, Iron or Nickel upon the Alpha-Beta Transformation and Gamma Precipitation in Cobalt-Chromium Alloys 154
Experimental Operation of a Basic-lined Surface-blown Hearth for Steel Production 694
Hydrogen Elimination by Aging 1331
Quaternary Alloys of Titanium 539
Ternary Alloys of Titanium 514
Titanium Binary Alloys 485
Batz, W., Mehl, R. F., and Wells, C.: *Diffusion Coefficient of Carbon in Austenite* 553
Discussion 1375
Batz, W., and Wells, C.: *Discussion on Analysis of Interstitial Diffusion Using Activity Methods* 1024
Bayer process 105, 662
Beck, P. A.: *Discussions: on Annealing Twins in Copper and 70-30 Alpha Brass* 1020
on Secondary Recrystallization in Copper 1053
Beck, P. A., and Hu, H.: *Recrystallization Texture and Coarsening Texture in High Purity Aluminum. Discussion* 1057
Beckman, G. W., et al.: *Effect of Annealing in a Magnetic Field upon Iron-Cobalt and Iron-Cobalt-Nickel Alloys* 287
Behavior of Pores during the Sintering of Copper Compacts 378
Bell Telephone Laboratories: *Correlation between Electrical and Thermal Conductivity in Nickel and Nickel Alloys* 951
Metallurgy Behind the Decimal Point 1097
Simple Torsion Pendulum for Measuring Internal Friction 1322
Slip Markings in Chromium 891
Twin Relationships in Ingots of Germanium 886
Young's Modulus and its Temperature Dependence in 36 to 52 Pct Nickel-Iron Alloys 1120
Bending zinc single crystals 1069
Beryllium-iron System. Discussion 1028
Beryllium and beryllium alloys: bronze, eutectoid, isothermal transformation 1229
equilibrium diagram 1230
thermal expansion characteristics 1274
titanium, binary, properties 496
zirconium system by powder metallurgy methods 59
phase diagram, hypothetical 66
Bessemer steels: effect of phosphorus and nitrogen 346
Bethlehem Steel Co.: *Manganese Equilibrium under Simple Oxide Slags* 341
Bever, M. B.: *Discussions: on Kinetics of the Reactions of Titanium with O_2, N_2, and H_2* 1063
on Undercooling of Minor Liquid Phases in Binary Alloys 1360
Bever, M. B., et al.: *The Iron-Nitrogen System* 261
Discussion 1354
Bever, M. B., and Rocca, R.: *The Thermoelastic Effect in Iron and Nickel as a Function of Temperature* 327
Bier, C.: *Discussions: on Determination of Boundary Stresses during the Compression of Cylindrical Powder Compacts* 1046
on Dilatometric Study of the Sintering of Metal Powder Compacts 1048
Binary alloys: copper-iron 1486
iron-cobalt, effect of annealing in magnetic field 287
magnesium, lattice parameters 1460
titanium 485, 1264
titanium with iron, cobalt, nickel, structure of intermediate phases 1173
undercooling of minor liquid phases in 136
discussion 1360
Binary effects: titanium alloys 282
Binary systems: chromium-nickel 270
iron-chromium 269
iron-nickel 269
iron-nitrogen 261, 307
Birchenall, C. E., and Cheng, C. H.: *The Vapor Pressures of Zinc and Cadmium over Some of Their Silver Alloys. Discussion* 1022
Birchenall, C. E., Hughes, L. A. and Rhines, F. N.: *Behavior of Pores during the Sintering of Copper Compacts* 376
Discussion 1372
Birchenall, C. E., and Mehl, R. F.: *Self-diffusion in Alpha and Gamma Iron* 144
Discussion 1374
Birchenall, C. E., and Schadel, H. M., Jr.: *Vapor Pressure of Silver* 1134
Birchenall, C. E., Schadel, H. M., Jr., and Derge, G.: *Activity of Liquid Silver-Silicon Alloys* 1282
Bismuth and bismuth alloys: supercooling of small particles 1147
titanium, binary, properties 498
Blast Furnace: conditioning Dwight-Lloyd gases to increase bag life 608
lead 669
lead, development at Port Pirie, South Australia 1221
mechanism of sulphur transfer 1111
slags, pH measurements. Discussion 1358
Blickwede, D. J., and Cohen, M.: *Isolation of Carbides from High Speed Steel. Discussion* 1061
Bloom, D. S., and Grant, N. J.: *The System Chromium-Carbon* 41
